

Introduction to JSP

Sr. No.	Assignment Question
1.	<p>Create a JSP project for displaying a welcome message with the current time and date.</p> <p>For this, first create a JSP file, which will import the Calendar and Date classes into it. With these classes show the date and time when the user invokes the JSP project with an appropriate welcome line.</p> <p>Create another JSP page which will show a logo.</p> <p>Include this second JSP page in the first one so that the logo will appear on the top of the browser above the welcome message.</p>
