Servlets and ServletContext

Sr. No.	Assignment Question
1.	Write a simple servlet that tells the programmer to develop a program for SHOP STOP shopping center. Ask the programmer to display the number of items the user purchases daily and allow the user to write general comments, if any. Display the values and the general comments on another HTML page.
2.	Create a servlet to generate a 301 error and redirect the user to another location, where that specified file is being moved permanently.
